Re: Docket # 98N-1038

Please be advised that since I do not wish to eat any irradiated food I want all food that is irradiated to be labeled and clearly labeled without ambiguity so that I can easily identify and avoid such irradiated foods, both from a nutritive + Palatability stand point.

A CBS Poll in 1997 indicated 77% of the population wish to avoid irradiated food. Your proposal to change the labeling to make it difficult to identify Irradiated Food is blatant greed ~~based~~ based disregard for the well + welfare of the people you serve.

C2629

Wise up

P.S. Irradiation is unsafe
Irradiation also changes Palatability + should be labeled for these reasons.
